DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-9 and 10-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP402172238A in view of JP2000068235A and in view of USPN 3,638,597 to Brown and USPN 5,953,951 to Fujimoto et al. JP402172238A shows and describes a die bonding apparatus including an expand tape and a pushup pin. JP2000068235A shows (e.g., Fig 6) and describes an expanding tape cutting stage. Both Brown (Figure 22) and Fujimoto et al (Figures 1-6 and 11) show a chamfered edge of a rim which protects a malleable material during stretching. The use of a chamfered edge on a die bonder comprising an expanding tape cutting stage would have been obvious at the

time applicant's invention was made to a person having ordinary skill in the art because it is well known to avoid sharp edges with stretched workpieces because of the possibility of rupture.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
